PROFILE

Builds AI systems, then proves they work: **four shipped AI projects** across agentic triage, RAG, tool calling, structured extraction, and LLM evaluation – each with its own **eval harness and CI suite**, three in production on Render. Two years in Genpact operations supply the instincts those systems automate: SLA pressure, escalation judgment, root-cause discipline. Backed by a PGP from Masters' Union.

PROFESSIONAL EXPERIENCE

Genpact **Aug 2024 – Aug 2026**
Associate and Subject Matter Expert – Operations *New Delhi, India*

- Analysed workflows handling **100,000+ cases a year** and proposed process changes behind an **18%** cut in turnaround time.
- Performed structured root-cause analysis of recurring defects and SLA deviations, tracking issues through Buganizer and validating corrective actions; operational defects fell **30%** with minimal SLA breaches.
- Automated management reports and dashboards in Excel and Power BI, cutting recurring reporting effort by **25%** (about **100 FTE hours a year**).
- Worked with Risk, Compliance, and Quality on controls and workflow changes supporting a **22% productivity uplift** in a ~20-person team.

TECHNICAL PROJECTS

FirstLine – AI Ops Triage Agent with Self-Scoring Evals GitHub · Live *Python, FastAPI, Ollama/Groq, pytest, GitHub Actions*

- Built an agentic first line of support that works a full ops shift – classifying root causes across 15 incident archetypes, clustering cross-service incidents, tracking SLA clocks, escalating judgment calls, and drafting RCAs – over a seeded simulator with hidden labeled ground truth.
- Designed an eval harness that grades the agent against that truth (triage accuracy, missed P0s, escalation precision); live Llama 3.2 runs surfaced **100% escalation recall at 21% precision** – safety by crying wolf; shipped with a **768-test CI suite** and a live triage dashboard.

Day 46 – AI Late-Payment Case Builder for Freelancers Live *Python, FastAPI, Claude API, pytest, GitHub Actions*

- Built a live app that turns a freelancer's WhatsApp chat and invoice into a payment claim: Claude extracts 12 event types under a JSON schema from a masked excerpt, code keeps only word-for-word quotes, and fixed templates fill a reminder, a demand letter and a case file.
- Kept every date and figure in tested code: the MSME Act interest engine matches a blind rewrite to the paisa on 2,500 cases; an accuracy page compares 3 models on 12 unseen synthetic Hinglish chats (**99% recall, 94% precision, 0 invented quotes**); **1,707-test CI suite**.

Synapse – Agentic RAG Document Assistant GitHub · Live *Python, FastAPI, FAISS, Ollama/Groq, pytest, GitHub Actions*

- Engineered a hybrid retrieval pipeline (BM25 + FAISS fused via Reciprocal Rank Fusion, LLM listwise reranking) feeding a 4-stage agent pipeline (planner, retriever, synthesizer, critic) that grounds answers in evidence and self-critiques unsupported claims.
- Added an observability UI, an eval harness for retrieval and faithfulness scoring, and a pluggable model backend; backed by a **31-test CI suite**.

PromptDrift – LLM Prompt Regression Testing GitHub *Python, asyncio, Ollama/Groq, pytest, GitHub Actions*

- Wrote a CLI that snapshots prompt behaviour into a committed baseline and fails CI when a change degrades it, sampling every case repeatedly so genuine regressions are separated from model non-determinism.
- Tiered assertions run deterministic checks before paid LLM-as-judge calls, cutting evaluation cost; guarded by a **157-test CI suite** across Python 3.10–3.13, running fully offline through a deterministic mock backend.

INTERNSHIPS

Bhagwan Parshuram Institute of Technology, GGSIPU **Jul 2023 – Aug 2023**
Data Analytics Intern *New Delhi, India* Certificate

- Analysed institutional datasets in Python and Excel and built KPI dashboards and automated reports, cutting repetitive manual effort by **25%**.

Defence Research and Development Organisation (DRDO) **Jul 2022 – Sep 2022**
Research and Development Intern *India* Certificate

- Supported development, validation, and signal analysis of an embedded wireless sensing prototype, improving reliability and reducing errors.

Agixury **Sep 2020 – Oct 2020**
Web Development Intern *Remote* Certificate

- Developed responsive web interfaces from business requirements and improved usability across desktop and mobile layouts.

LEADERSHIP

President, Sports Club *Masters' Union* *Gurugram, India* **Oct 2026 – Present**

- Lead the club's committee and calendar: fixtures, tournaments and inter-college participation.

EDUCATION

Masters' Union **Aug 2026 – Present**
PGP in Applied AI and Agentic Systems *Gurugram, India*

Bhagwan Parshuram Institute of Technology, GGSIPU **2020 – 2024**
B.Tech in Electronics and Communication Engineering | *CGPA: 8.53/10.0* *New Delhi, India*

Faith Academy Senior Secondary School, CBSE *Class XII: 92.8%* | *Class X: 94.2%* *New Delhi, India* **2018 – 2020**

TECHNICAL SKILLS

Programming and Data	Python, SQL, SQLite, FastAPI, Flask, REST APIs, NumPy, asyncio, data analysis, exploratory data analysis
Applied AI	Machine learning, generative AI, agentic AI, multi-agent orchestration, large language models, embeddings, prompt engineering, tool calling (function calling), guardrails, Retrieval-Augmented Generation (RAG)
Retrieval, Evaluation and Cloud	Hybrid retrieval (BM25 + FAISS), reciprocal rank fusion, LLM reranking, vector databases, LLM evaluation (LLM-as-a-judge), faithfulness scoring, eval harness design, prompt regression testing, observability, LLMOps, GenAIOps, model APIs (Claude, OpenAI, Ollama, Groq), Microsoft Azure AI, Snowflake, Render
Analytics and Development Tools	Power BI, Tableau, Advanced Excel, Git, GitHub Actions, CI/CD, Docker, pytest, test automation
Delivery and Problem Solving	Root-cause analysis, process improvement, stakeholder communication, customer-facing delivery

SELECTED CERTIFICATIONS

Professional Certificates: Snowflake Generative AI | Microsoft Azure AI Essentials | Astronomer Data Engineering Foundations
AI Engineering: Become an AI Engineer | GenAIOps Foundations | Generative AI in Cloud Computing
LLMs and RAG: Fine-Tuning for LLMs | Advanced LLMs with RAG | Vector Databases and RAG | AI Ecosystem for Developers
